The Citrix receiver has been replaced with Citrix workspace app. You can download the new app from one of the citrix website, like

<https://www.citrix.com/en-au/downloads/workspace-app/linux/workspace-app-for-linux-latest.html>

Download the workspace app debian package. For some reason, the software installer can not open the file.

Find the .deb package on your disk :

```
$ ls icaclient_xx.yy.0.zzz_amd64.deb
```

Make sure you search the right version !

In the terminal, go to the folder containing the file and use the dpkg command to install the package:

```
$ sudo dpkg -i icaclient_xx.yy.0.z_amd64.deb
```

That's it, package is installed.
