Description

The NativeSvgHandler extension allows SVG files to be served directly to clients for client-side rendering.

Installation

Download

Download and place the file(s) in a directory called NativeSvgHandler in your extensions/ folder.

Activation

Add the following code at the bottom of your LocalSettings.php:

wfLoadExtension('NativeSvgHandler');

Security

NativeSvgHandler serves SVG directly to clients through image tags, which is not vulnerable to XSS attack.
XSS attacks are only relevant when it is accessed directly through original file on the file page, which is neither in the scope nor in control of this extension.
