## Description

The WhosOnline extension adds a special page - Special:WhosOnline - for viewing the list of users currently viewing a page on the wiki.

## Installation

### Download

Download the extension from [here](#).

### Activation

Set this in your LocalSettings.php file

```
wfLoadExtension( 'WhosOnline' );
```

### Configuration

Set

```
$wgWhosOnlineShowAnons = true;
```

If you want anonymous users IP addresses shown. Default is not to show them, for privacy reasons.

## Usage

Users who login after the extension is installed can be seen at Special:WhosOnline. Refresh the page if it is blank. As of version 1.3.1 it is possible to include the contents of the special page into a page: `{Special:WhosOnline}`. If you use `{Special:WhosOnline/10/shownav}` it will only show 10 users and will have the navigation controls.
