Remove the Sidebar and main logo at MediaWiki:Sidebar To completely remove the sidebar and logo:

Blank the MediaWiki:Sidebar page and save.

Then add:

```
#column-content { margin: 0 0 1em 0; }
#content { margin: 0 0 0 0; }
#p-cactions { left: .1em; }
```

This moves the main text of your wiki to the left.

Add or remove toolbox sections (JavaScript) The toolbox appears on the left under MediaWiki:Sidebar. The toolbox is a dynamic element requiring programmatic methods such as skin extensions, PHP (see skins/MonoBook.php and creating a new skin) or JavaScript.

The JavaScript solution uses User:{username}/common.js / MediaWiki:Common.js, available for MediaWiki 1.9+.

Entire MediaWiki website: copy the script below into MediaWiki:Common.js

One specific user: copy the script below into Special:MyPage/common.js (or the JS page for the user's current skin, such as Special:MyPage/monobook.js).

Now simply configure which link should appear in which section. You also can remove some links if you want to.

```
function ModifySidebar( action, section, name, link ) {
    try {
        switch ( section ) {
            case 'languages':
                var target = 'p-lang';
                break;
            case 'toolbox':
                var target = 'p-tb';
```

```

        break;
    case 'navigation':
        var target = 'p-navigation';
        break;
    default:
        var target = 'p-' + section;
        break;
    }

    if ( action == 'add' ) {
        var node = document.getElementById( target )
        .getElementsByName( 'div' )[0]
        .getElementsByName( 'ul' )[0];

        var aNode = document.createElement( 'a' );
        var liNode = document.createElement( 'li' );

        aNode.appendChild( document.createTextNode( name ) );
        aNode.setAttribute( 'href', link );
        liNode.appendChild( aNode );
        liNode.className = 'plainlinks';
        node.appendChild( liNode );
    }

    if ( action == 'remove' ) {
        var list = document.getElementById( target )
        .getElementsByName( 'div' )[0]
        .getElementsByName( 'ul' )[0];

        var listelements = list.getElementsByTagName( 'li' );

        for ( var i = 0; i < listelements.length; i++ ) {
            if (
                listelements[i].getElementsByName(
                    'a' )[0].innerHTML == name ||
                listelements[i].getElementsByName(
                    'a' )[0].href == link
            ) {
                list.removeChild( listelements[i] );
            }
        }
    }

    } catch( e ) {
        // let's just ignore what's happened
        return;
    }
}

```

```
function CustomizeModificationsOfSidebar() {
    // adds [[Special:CategoryTree|Special:CategoryTree]] to toolbox
    ModifySidebar( 'add', 'toolbox', 'CategoryTree',
'https://en.wikipedia.org/wiki/Special:CategoryTree' );
    // removes [[Special:Upload|Special:Upload]] from toolbox
    ModifySidebar( 'remove', 'toolbox', 'Upload file',
'https://en.wikipedia.org/wiki/Special:Upload' );
}

jQuery( CustomizeModificationsOfSidebar );
```
